LIFE & DEATH

(THE TRUCK PROBLEM)

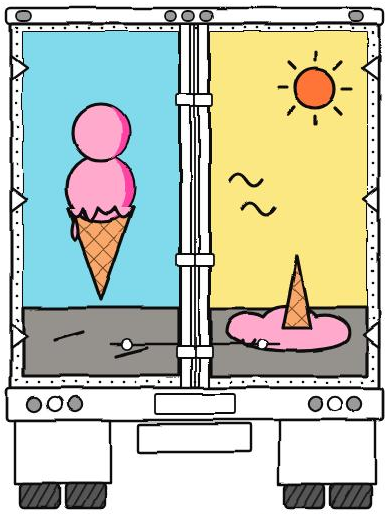

NO COLOR = NOT DONE!

Picking the wrong side to pass a semi truck can be life or death. Your job: turn the truck's two back doors into a two-part story.

01 THE PROBLEM

Candle → wax puddle

Ice cream → sidewalk drip

LEFT DOOR = LIFE

Draw one object, animal, plant or food. Make it **accurate**: real shape, real shading. It looks alive, new or whole.

RIGHT DOOR = DEATH

Show **the same thing** destroyed or transformed. A stranger should get it in 3 seconds.

Taken: these two, a phone at 1%, a tree stump, a sandcastle. Think of your own!

02 THE RULES

- The **same subject** on both doors.
- Fill each door edge to edge, background too.
- Pencil first, then **color it.** No color = not done.

Clever, not gory. Make people smile or think. No weapons aimed at people or animals, no blood, no self-harm, no real people.

03 HOW TO WORK

everything goes on the back

1 LIST 5 — things that can live or die. Objects count!

→

2 PICK 1 — the one that reads fastest. Circle it.

→

3 DRAW IT — big on the truck, in pencil

→

4 COLOR IT — both doors, edge to edge. Then it's done.

04 HOW IT'S GRADED

4 pts · done early? Do a 2nd truck for bonus

- ☐ 1 pt **Planning:** 5 ideas listed, best one circled.
- ☐ 1 pt **Life door:** accurate shape, with real shading.
- ☐ 1 pt **Death door:** the same subject, and it reads in 3 seconds.
- ☐ 1 pt **Colored:** both doors fully colored, edge to edge.
